EXPERIENCE

TRIGENT — Bangalore

Gen AI Intern | Feb 2026 – Apr 2026

- Built AI-powered workflows and automation solutions using n8n, Flowise, Python, and TensorFlow.
- Developed and tested conversational AI applications, chatbots, and intelligent automation pipelines.
- Worked with data processing, visualization, and predictive analytics to create AI-driven solutions.
- Gained hands-on experience in Generative AI, LLMs, prompt engineering, and real-world AI deployment.

Yamaha — Pollachi

Spare Parts Manager | Apr 2024 – May 2024

- Supervised daily spare-parts operations within the service department, ensuring uninterrupted availability of materials for repair and maintenance tasks.
- Coordinated with multiple suppliers to maintain accurate stock levels, prevent shortages, and enhance supplier communication efficiency.
- Designed and implemented a structured Excel-based cataloging and tracking system that reduced spare part retrieval time by approximately 20% and improved workflow.
- Ensured compliance with Yamaha's quality standards by verifying new stock materials and maintaining detailed documentation.

ROYAL ENFIELD — Chennai

Quality & Spare Parts Management | Apr 2023 – Dec 2023

- Supported quality assurance processes by validating components and contributing to root-cause analysis reports.
- Tracked and maintained inventory using Excel, improving data accuracy and preventing shortages of high-demand parts.
- Partnered with suppliers and service technicians to identify frequently required components, streamlining reorders and reducing downtime.
- Introduced a simple monitoring system for spare-parts flow, improving coordination between logistics and quality units.

EDUCATION

Dr. Mahalingam College of Engineering and Technology, Anna University — Pollachi

Bachelor of Technology in Artificial Intelligence and Data Science | CGPA: 7.3 | Jul 2024 – Jun 2027

- Studying core concepts in machine learning, deep learning, data analysis, and natural language processing.
- Gaining hands-on experience with Python, TensorFlow, and data visualization tools.
- Learning to design AI-driven applications and implement data-driven decision systems.
- Conducting projects focused on real-world AI solutions, including chatbots and predictive analytics.

Sri Ramakrishna Polytechnic College — Coimbatore

Diploma in Mechanical Engineering | Percentage: 80% | Jul 2020 – Jun 2023

- Studied mechanics, thermodynamics, manufacturing processes, and CAD design.
- Learned principles of machine maintenance, production planning, and quality control.

Sahayamatha Matriculation Higher Secondary School — Karaikudi

Secondary School Leaving Certificate (SSLC) | Percentage: 73% | Jun 2019 – Apr 2020

- Completed foundational education with emphasis on mathematics, science, and computer fundamentals.
- Actively participated in science fairs and team-based technical activities.

PROJECTS

Automated Fire-Extinguishing Robot

Arduino, ESP32, C Programming

- Built an autonomous robot with real-time flame detection and suppression, integrating wireless control and temperature sensors.
- Demonstrated the system at a technical event, achieving precise flame detection and automatic response accuracy.

AI Legal Chatbot

Python, NLP, OpenAI API, Flask

- Developed a conversational chatbot capable of answering legal queries using NLP and contextual AI models.
- Deployed via Flask-based web interface for real-time user interaction and dynamic query handling.

Rockfall Prediction System

Python, Machine Learning, Pandas, Scikit-learn

- Designed an ML model to predict rockfall risk zones based on environmental and geological datasets.
- Enhanced model accuracy using feature engineering and visualized outcomes for risk assessment.

ADDITIONAL

NEHA Solutions — Python with AI

- Gained hands-on experience in Python programming, model training, and data automation using AI tools.

SAM Injection Moulding — Engineering Intern

- Assisted in production quality checks and process documentation, learning industrial standards and workflow management.
